The Art of Air Purification
In 1999, we started our mission to improve the health and well-being of our customers by designing and manufacturing the safest, most reliable, and most effective air purification systems on the market. Since then, we have expanded from New York City to all throughout the USA. Internationally, Airgle Holdings includes businesses in Hong Kong, South Korea, Japan, India, the Middle East, and major cities throughout China.

Our dedication to purifying Air with a Great Level of Efficiency has made us a world-class provider of air purification systems all around the globe. Some of our customers include: The Royal Family of Saudi Arabia, NASA, the US Government, MIT, the Board of Education of New York City, the New York Science Hall, University of Michigan, Samsung Electronics, Mercedes Benz trucks, the Hong Kong Subway and thousands more.

Our systems consistently beat hundreds of our competitors’ products in a wide array of third-party tests. Our patented Photo Catalytic Oxidation technology is leading the next generation of air purifiers. This technology, called the Titanium Pro® UV module along with our cHEPA technology removes particles down to 0.003 microns with an efficiency of 99.999%. Airgle air purifiers are the first in the world to deliver the highest CADR ratings with a 100% sealed design.
The Airgle AG600 breaks down harmful particles down to 0.003 microns with an efficiency of 99.999%. It is specifically designed to purify the air in small to medium size rooms. Our patented photocatalytic oxidation technology, called the Titanium Pro® UV module, can clean the air at a level never seen before. This next-generation technology is the answer to severe allergy and asthma sufferers, as well as people with other critical respiratory problems.
The Airgle AG500 is our most popular general-purpose air purifier for small and medium size rooms. It effectively removes a large variety of particulate and molecular air pollutants, greatly improving the air quality in the designated space. It offers additional odor filtration to truly get rid of odors, and rigorous testing by third parties has shown that the Airgle AG500 filters out tobacco smoke, pollen, and dust at impressive rates*.

* Tobacco smoke > 238 CFM  Pollen > 239 CFM  Dust > 253 CFM
The Airgle AG800 brings the highest standards of air purification to large rooms. It exceeds CADR industry standards - the only air purifier standard that is recognized as an American National Standard. In an independent test performed by the Association of Home Appliance Manufacturers (AHAM), the AG800 achieved CADR ratings that are among the highest in the industry. Tobacco Smoke >450 CFM, Pollen >450 CFM, Dust >400 CFM.
The Airgle AG900 offers a medical-grade air purifier that is specifically engineered for airborne infection control at hospitals, medical clinics, and other health care facilities. With our patented next generation Titanium Pro® module, cHEPA technology with an efficiency over 99.999% and 6 lbs of premium deep carbon blend, the AG900 can remove particles as small as 0.003 microns. It is remarkably quiet, easy to move around, and perfect for severe allergy and asthma sufferers, as well as others with critical respiratory problems.
Remove radon from radioactive gases

The Airlge AG600S is specifically engineered to remove radon from radioactive gases. Radon is the leading cause of lung cancer for non-smokers and responsible for 21,000 lung cancer deaths each year. Although it is a natural element that can be found everywhere, some geographical locations in the US and the world have significantly higher concentrations of radon. With its premium radon removal filter, an antimicrobial cHEPA filter with 99.999% efficiency, the Airlge AG600S is the single most effective way to battle radon.
Introducing the next generation of air purifying technology, the Airgle Face Mask is an engineering marvel. The mask is hand-tailored with an ergonomic design and equipped with HEPA and PCO technology to provide superior protection against particles, VOCs, and bacteria. Experience pure, comfortable mobility with the Airgle face mask.

MODELS: AM120M / AM120W / AM120G / AM120B
Enhanced PCO and HEPA Technology for Particle, Chemical, Odor and Microbe Filtration.

- Meets N95 criteria
- Airgle PCO technology kills bacteria and virus
- Comfortable design for nose clip and pad
- Breathe easy with the dual exhalation valve
- Washable wing

AM120M (Man)  AM120W (Woman)  AM120B (Boy)  AM120G (Girl)

The First Air Purifier Type Mask in USA
The Airgle Personal air purifier (AG25) is conveniently built for dual operation in both car and office environments, making it a great pick for you. It is equipped with cHEPA, activated carbon and PCO filtration technologies that remove airborne pollutants, such as dust particles, odors, second-hand smoke, bacteria, viruses, allergens and VOCs. The AG25 also features Airgle auto cleaning technology and auto temperature control settings for ultimate comfort and ease.
Product Features

- **Gas & Odor Filter**: Captures gaseous pollutants
  Features coconut shell activated carbon and removes smoke and odors. Purifies TVOC and formaldehyde.

- **cHEPA Filter**: Filters particulate contaminants
  Features cHEPA filter, which has an efficiency of 99.999% for 0.003 micron particles, and removes particulates, dust, pollen, pet dander, smoke and other airborne pollutants.

- **Titanium Pro®**: Removes bacteria and TVOC
  Our patented Titanium Pro Module kills up to 99.97% of bacteria and viruses with PCO technology.
Kickstart Healthier Living with Water Purification

Remove Chloramine / Turbidity and Sediments / Volatile Organic Compounds

The Airgle WG500 improves the taste of your family’s water, while also making it cleaner and clearer. The major materials components used for our countertop water purification system are certified by the NSF and the FDA.
Titanium Pro® UV Module

Effectively removes chemicals, bacteria, viruses, and TVOCs
Titanium Pro® UV PCO Technology

- 10-14 watt UVC Lamp
- Plug and play technology
- Very efficient at room temperature
- No chemical additives
- No residual ozone
- High oxidation yields for gas phase reactants and odors
- Low energy requirements
- Works in humid conditions
- Long service life
- Low maintenance requirement
Performance

- Ultra-quiet motor technology
- Aluminum housing
- Easy-to-replace Filters
- Handy remote control
- Ozone-free technology
- Energy Star qualified
- Programmable LCD control panel
- Auto & night modes
- Variable timer
- System control setting
- Continuous air quality monitoring
- Plug and play technology
Third party testing of particle 2.5 and 10 microns removal rate by ZOL.com.cn for 23 leading brands of air purifiers (unit: UG/M³, the small residue, the better result)

Third party testing of smoke particle removal rate by ZOL.com.cn for 23 leading brands of air purifiers (unit: seconds, the less time used to remove, the better result)

Third party testing of applicable area by ZOL.com.cn for 23 leading brands of air purifiers (unit: m², the large area, the better result)
Certification
Association of Home Appliance Manufacturers

Independently Tested. Consumer Trusted.
